3.3 Known Issues	5
3.4 Known Workarounds	5
4.0 DATE/TIME OF OUTAGE.....	5
5.0 RELEASE RECOMMENDATION	5

1.0 How to Read This Document

The release description is separated into several sections. The purpose of the document is to outline the test recommendation on whether or not to proceed with the next planned step in deployment, whether that is to an acceptance test phase or to production. Additionally, the release details are outlined in the other sections. The major sections and their purpose are outlined below:

- ***Delivered Functionality*** – All requests scheduled for the target point release.
- ***Impacts to the MSIX Environment*** – This section summarizes the review of all aspects of the MSIX environment and their impact on the release.
- ***Deviations from the Test Plan*** – This section lists areas where the test plan and/or approach were modified during the course of the project to accommodate project or program changes. If one area necessitated more or less attention than planned, that would be outlined here.
- ***Known Issues*** – Issues that exist at the time of the release. These would coincide with the Recommendation Type.
- ***Known Workarounds*** – Workarounds that exist in conjunction with the Known Issues.
- ***Recommendation*** – This section summarizes the recommendation by the test organization on whether to proceed or not. The recommendation will prompt the reader whether it is necessary to read in-depth further in the document to make a business decision to proceed, although it is always recommended to read the entire document before proceeding. The options for recommendation are:
 - Release with No Issues
 - Release with Minor Issues
 - Release with Major Issues
 - Do Not Release

2.0 Delivered Functionality

AMPM Request	Short Description
212743	New MDE: District of Residence
218046	New MDE: Residency Date
218048	New MDE: Enrollment Comments
218047	New MDE: Home schooled
209499	Near Match Worklist Replacement
210863	Add district and school name in move notification emails
216082	External link warning
213959	Change label in change password page to old or temporary
209793	Send email to SUA confirming password resets
168594	Add MSIX ID to Raw View, if available
171482	Display flags at student level
205022	Store eRoom materials in MSIX
210830	Allow email notifications to be sent from non-master records
218131	Add functionality to prevent merge actions if student is on a near match work list
205230	Add functionality to check required conditions before a state user administrator role can be removed or the account be deactivated
207745	Change Account Activation and Account Expiration dates to optional fields
218624	The Change Password page shall display checks against password criteria
165440	Copy emails to MSIX system admin when state file emails are sent to state batch submitter
170057	Cannot find regions when the Edfacts reference has null in the county field
329921	Cannot properly perform a student search with apostrophe in the name
218717	Student Split Enhancements
218708	The way we are capturing district information for districts users is different than how we do it in the reference table (integer vs. string). Leading zeros are being dropped
218710	Add file key filter to datapump job
218711	MSIX Users with duplicate email address if User Admin clicks submit more than once
218712	After merge and split validation update the status in the database

2.1 Deferred Changes

The following changes were deferred to a later release, to allow complete testing and review.

- No deferred changes

3.0 Impact & Exceptions

None

3.1 Impacts to the MSIX Environment:

Impacts to the environment were reviewed. This functional release has no impact to the MSIX environment. The release items include functional enhancements.
